Skills

Languages: JavaScript/TypeScript, HTML, CSS

Frameworks: React, Next, Tailwind, MUI

Software/Tools: Git, Node.js, Figma, Express.js

Databases: MongoDB, Firebase

APIs: REST, Web Socket

Projects

1. Manga App

Developed an immersive Manga exploration app

• The application leverages the MangaDex API to fetch and display manga information.

- A custom Node.js proxy server that I built to handle requests to the MangaDex API.
- Node.js and Express.js server handling user authentication, user data management, and reading list operations.
- Technologies: React, Tailwind CSS, MangaDex API, JavaScript, Node.js, Express.js, MongoDB, Git.

2. Real Estate

Built a platform for searching and viewing properties

Smooth animations powered by Framer Motion and GSAP

 Technologies: React, React Router, Tailwind CSS, JavaScript, Rapid API, Git Dec 2022 - Present

Oct 2023 - Present

Live Site: Manga App

GitHub: GitHub Repository

Live Site: Real Estate

GitHub: GitHub Repository

3. Firebase Blog Site

Designed and developed a dynamic blog website

- Leverages Firebase for real-time updates, secure authentication, and efficient data management.
- Integrates Prism for syntax highlighting in code snippets.
- Technologies: React, Firebase, React Router, Prism, FontAwesome, API, JavaScript, Node.js, Git.

Jan 2024 - Present

Live Site: Blog Site

GitHub: GitHub Repository

4. My New Portfolio

 Crafted a dynamic portfolio with React.js, Tailwind CSS, Framer Motion, and other technologies, showcasing a fusion of creativity and technology.

GitHub: GitHub Repository

Jul 2022 - Oct 2022

Live Site: Portfolio

Jan 2024 - Present

- Smooth animations powered by Framer Motion
- Integration with Email.js for handling contact form submissions
- Technologies: React.js, Tailwind CSS, Framer Motion, React Icons, React Router.

5. Crypto Website

 Description: Contributed to a cryptocurrency tracking platform, focusing on modern design and responsive elements
Live Site: <u>Crypto Website</u> GitHub: <u>GitHub Repository</u>

• Technologies: React, MUI, API, React Router, JavaScript.

Education

GoMyCode Nov 4th, 2023 – Jan 29th, 2024

Introduction to React JS: Completed an intensive boot camp focused on React.js and web development at GoMyCode. Acquired practical skills in building dynamic and interactive web applications

Course Experience

- API Development and Integration
- Computer Architecture
- Data Structures & Algorithms
- Backend Development with Node.js

- Professional Responsibility & Ethics
- Database Management
- Authentication and Authorization
